DATA TRANSMISSION

Valid for all common systems and programs

- ☐ Send motives in original size (100%) and right-reading
- ☐ Use format 8+3 for the datafile name (no long file names!) and additionally, please name the graphic format (e.g. EPS, TIFF, ...) and the software version, in which the file had been created.
- ☐ Data, not required for hotstamping tool production, increase the transmission time, therefore remove all contents, which are not required for production before starting the transmission.
- ☐ Please convert all fonts, contained in the datafile into path.
- ☐ For multi-level hotstamping die executions, it is useful, if you put the different relief executions into separate layers. The layout becomes clearer and the risk of errors gets minimized.
- ☐ Additionally, please create a PDF- datafile for us to control the data. If to send this via data line is not possible, information by fax could assist as well.

Using Macintosh

- | | |
|-------------|--|
| Illustrator | • convert to path • save as *.EPS or *.AI, min. version 5.0 • save as curves (presently available version at H+M: Illustrator CS2) |
| FreeHand | • convert to path • save as *.FH / export as *.EPS (MS-DOS) or *.AI (presently available version at H+M: FreeHand MX) |
| Photoshop | • convert to bitmap, resolution min. 600 DPI, Scans min. 1200 DPI • save as *.BMP or *.TIF |
| QuarkXpress | • LZW compression OK (presently available version at H+M: Photoshop CS2) |
| | • send all belonging fine-grain data (images and fonts) (presently available version at H+M: QuarkXpress 3.32) |

Using PC

- | | |
|------------|---|
| Corel Draw | • save as *.CDR / export as *.AI, min. version 5.0 • save as curves (presently available version at H+M: Corel Draw 11.0) |
| Photoshop | • convert to bitmap resolution min. 600 DPI, scans min. 1200 DPI • save as *.BMP or *.TIF |
| | • LZW compression OK (presently available version at H+M: Photoshop CS2) |

Using other DTP-Software

- | | |
|---------------|---|
| *.EPS / *.AI | • convert to path • save as curves |
| *.TIF / *.BMP | • convert to bitmap, resolution min. 600 DPI, scans min. 1200 DPI |
| *.PCX | • maximum resolution • medium quality |
| *.PS | • several Postscript Levels • attach test file |
| *.DXF | • data from AUTO CAD (AUTO-SCATCH) |

We put your ideas into shape.

No matter whether sketch or computer drawing.

Send us your data via file transfer to the following numbers, 24hours a day.

ISDN for PC	4SIGHT	+ 49 (71 61) 9 78 22 - 706
